Authorization for this examiner's amendment was given in a telephone interview with William N. Hogg on December 27, 2005.

The application has been amended as follows:

Claim 1, last line after "base" insert --, wherein the curing agent is a ruthenium-based catalyst--.

Cancel claim 4.

The following is an examiner's statement of reasons for allowance:

The lowering of the particle size of the capsules to 10 microns or less as originally defined in claim 15 overcomes the closest prior art to the Kessler et al. article which sets forth a particle size of 16 microns as indicated in the non-Final rejection mailed December 5, 2005 on page 5, paragraph 7.

The limitation of the curing agent to the ruthenium-based catalyst of claim 4 eliminates Sawaoka et al. Patent No. 5,589,523 which does not recite such as species.

Claims 8-14 and 16 were deemed to be allowable for the reasons espoused on page 5, paragraph 8 of the non-Final rejection.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
